Subject: ED Stainless Steel Rail Changeout - JOB#: 073393 - Toyota Georgetown, KY D1 Water Spray S.S

To whom it may concern,

Just wanted to provide some positive feedback on what I considered a job well done. Mike Brandt, project leader for GENESYS provided a very professional atmosphere and completed the job in a safe and timely manner. He provided total control from staging the equipment to disposal of all rail remnants. Mike provided the safety and leadership that I expect to see from our contractors (but don't always get). You guys have a "jewel" in Mike, and I would be happy to have him back at TMMK anytime. Thanks for making my job easier by sending Mike Brandt.
