Subject: GENESYS CAP Hood P&F System

Steve,

I am the Ford VO Closure Engineer. The P&F System landed in my Closure area.

Today is the last day of GENESYS standby crew in our plant here in Chicago. Next week they are all going on their next assignment.

Here I'd like to utilize this opportunity to thank GENESYS Program Management team / Engineering team lead by Al Martinac, Gary Whitlow, KC installation crew lead by Steve Rogers. They provided outstanding performance to me, more important that is for my company Ford Motor Company.

- Project is on time. Throughput reaches the target.
- Build and install to design target
- Resolve issues on site
- Continuous improvement

etc...

They did all.

Thanks.

John Chen
