5455 NW Lee's Summit Road  
Lee's Summit, MO 64064

Dear Mr. Perry:

I want to express my sincerest gratitude to GENESYS for a "job well done". The attention to detail GENESYS provided during all phases of this project was exceptional. The project involved interfacing with existing equipment, refurbished or modified equipment and prototype equipment GENESYS designed for our processes. The project re-defined the word "integration".

Your designs were not just innovative and functional but robust and user friendly as well. Many equipment designers only look at production functionality but GENESYS also incorporated ease of maintenance as well as maintenance free designs. Gary Whitlow and his team were very open to design ideas from Philips and were always willing to do what it took to make us happy.

Steve DeMott (Site Superintendent) did an outstanding job at managing all the sub-contractors throughout the installation and de-bug process. The "can-do" attitude that was present in Steve and his team was what helped make this project a success.

Finally I want to say "thank you" to Steve Lucido (Project Manager) and his management team for their planning and follow-up. They partnered with Philips throughout all phases making sure we had the support we needed and key milestones were met on time.

Sincerely,  
Tom Harmon - Project Manager
