RE: 2013 F6 Rebuild, Newark OH

Dear David:

I'm pleased to advise that Owens Corning is very appreciative of the tremendous job that you and the Genesys Team did on the F6 Rebuild. The total effort was well executed, meeting all the key criteria of the project.

First and foremost the construction effort was accomplished accident free which was the result of a well planned and executed effort. The project met production goals in part from meeting the construction schedule and excellent quality of design and construction. Final costs for the project were in line with budget.

This was our first project where we expanded the EPC approach to include the Forming section and Environmental systems, in addition to the traditional Oven work. We worked through some learning in working together in these areas that will provide a good basis for the next project.

I know that I will forget to mention a number of folks but certainly much credit goes to you, Brian Shaw, John Fralick, Greg Grosser, Jacob Hawthorne, Craig Montgomery, Brian Perrin, Brad Fountain, Eddie Hall, Zach Miles, Mike Desselle, Paul Bridgewater, Bryce Engeman.

I would like to extend a sincere thanks to the entire Genesys team for a Safe and successful project. I look forward to working with all of you again in the near future.

Sincerely,

A handwritten signature in dark ink, appearing to read "Forrest", written in a cursive style.
