Nothing but positive feedback for GENESYS Corporation:

GENESYS Team performed efficiently and reduced a (7) weekend project schedule by (2) full weekends.

Teamwork and communication got it done.

Key efforts +

- Doug Lennie professionally took time to understand the work and structure team.
- Joe Guenther assembled a quality workforce and under his supervision maintained an orderly, safe, and clean jobsite.
- Phil Goldsby provided solutions to field interferences and clearly communicated them which resulted in timely approvals.
- Brian Roder effectively managed the project remotely through follow-up and follow-through; proactively addressing open points before becoming issues.
- Contributions from GENESYS team behind the scenes.

Best Regards,

Blaine
